"Ethical Standards", regarding Worland's disappointment with C.R. Bard in not taking responsibility, specifically with the Recovery filter, as the Reps are "under the same pressure to push their products even though the products may be faulty"; "from the beginning, [the Recovery] had a migration problem" and many physicians were skeptical, until Denver Metro area sent an e-mail to stop using it ASAP. "I don't know who to believe," Bard or national research papers. (2) 8/31-9/2/2005 E-mail exchange b/w Ben Haygood and John Worland Re. "BARD IVC Filter Event Report" detailing the Rose event in which a filter rotated 80 degrees, migrated 4 cm caudally, 3 legs punctured the IVC, and head sidewalling into the vessel wall, with eventual retrieval but resulting extravasations in the puncture areas; Haygood responded that "these numbers are

1917			Romney, 01/18/2017, Exhibit 2052 - 9/25/2012 E-mail from Kim Romney to TPE-Vascular Sales Re. "Filter Facts 09.25.12", relaying the findings of the Durack et al. article (perforation in 86% of the Celect and Tulip filters, with all filters showing some degree of perforation after 71 days) and instructing that the team "know how to use it". Same day, Brian Doherty relayed that it should be going to the entire sales force, not just Peripheral or Vascular, regardless of the product.
1918			Romney, 01/18/2017, Exhibit 2053 - 3/8/2010 BPV Memo from Jim Beasley to Tim Ring Re. "Monthly Management Report", detailing the recent developments of filters (2/16/2010 phone call with FDA in position to no longer requiring a randomized trial for the prophylactic indication, the product development/launch schedule for the Eclipse and Denali IDE, and the G2X launch on 1/14/2009). Also includes 45 total MDRs in February 2010, including several filter complaints pertaining to the Recovery and G2 filters.
1919			Romney, 01/18/2017, Exhibit 2054 - 8/30/2011 E-mail from Brian Reinkensmeyer to Bret Baird and Hans Yentz, with several CCed, Re. "Reach - solved another problem!", relaying that he had just met with the head of IR at a redacted hospital who used to be an Eclipse account, but they lost it due to caudal migration complications and since moved to Celect for retrieval and Tulip for permanent filters. Reinkensmeyer presented REACH to the doctor, which "solved a problem I had not heard of before": a poor job at getting patients back for retrievals. Bret Baird forwarded too many same day,

			relaying this success story about the REACH program.
1920			Romney, 01/18/2017, Exhibit 2055 - 4/11/2013 E-mail from Kim Romney to TPE-BPV Sales Re. "Filter Facts 04.11.13 SIR SPECIAL EDITION", forwarding an eBlast that Argon had sent to SIR members that day - the now available Option Elite Retrievable Filter. Romney mentioned that it was an exciting week for Optional filters at SIR, given that they were presenting clinical data on "an entirely new and completely redesigned filter", the Denali, which "comes from the largest and longest filter study to date".
1921			Romney, 01/18/2017, Exhibit 2056 - 12/3/2012 E-mail from Kim Romney forwarding Endovascular Today's publishing of the "Featured Technology article on the Meridian filter" in their November issue, "the first time in print that physicians have talked about the Meridian filter"

Exhibit No.	Marked for ID	Admitted in Evidence	Description
1922			<p>Romney, 01/18/2017, Exhibit 2057 - 11/11/2012 High Importance E-mail from Chad Modra to Jon Conaway, requesting the filter team's position on the November filter complaints about failure to advance and deployment issues/failure to expand; Conaway replied on 11/13 that "The filter team does not have any concerns at the movement, as overall Meridian complaints have been trending down and...the subject complaints do not demonstrate extreme deviations from historical trends". Modra then replied that there were 9 Meridian complaints in October (3 deployment issues, 3 failure to expand, 2 fracture, 1 migration) and reiterated that the complaints did not trend down, but had been going up the past 4 months (includes chart of complaint trending for G2, G2X, Eclipse, and Meridian). Final message from Conaway expressed their need to determine what could be attributed to the complaint increase (i.e. any common trends between failure modes/users).</p>
1923			<p>Romney, 01/18/2017, Exhibit 2058 - 9/25/2012 E-mail from Jack Sullivan to TPE-Vascular Sales Re. "FW: Filter Facts 09.25.12", expressing that they were "winning all over the country with Meridian and REACH" and listing the path to "great success in the field with Meridian" (i.e. "plant seeds about Cook filters, while promoting the safety and efficacy of Meridian w/ the REACH story"... "punch Cook in the face". Mike Perko reiterated that it was "time to stop dancing around with our competitors", as "there is no better combination than Meridian and Reach"; directed the team to "get mean</p>

			and nasty". On 9/26, Mike Leland e-mailed Mike Perko, having just received a call from a redacted physician, a large volume target, who had two "very adverse" outcomes with Bard filters and wanted data attached to the Meridian and a response from Bard specific to class action lawsuits. The doctor felt the Cook filter was safer and more reliable than Bard. Talk of showing testing videos showing migration with and without caudal anchors, and Leland responded on 10/3 that they were in process of getting those videos approved.

1925			Romney, 01/18/2017, Exhibit 2060-4/25/2012 E-mail from Schyler Smith, Territory Manager for BPV in Washington-Idaho-Montana, to BJ Reed Re. "Safe Meridian Retrieval Windows", inquiring about the upper limit on the timeframe in which it is safe to attempt retrieval of the Meridian filter. Angela Crall answered, attaching the Meridian sales brochure and relaying that there "is no upper limit on the retrieval window", as the clinical trial (G2/EVEREST) showed successful retrievals out to 300 days, with several successful G2 filter retrievals with indwell of over 5 years, and they expected similar outcome for Meridian, as the Meridian titanium arm anchors improved resistance to movement in the cava (resisting tilt, migration, and penetration).

1926			Romney, 01/18/2017, Exhibit 2061 - 8/6/2014 E-mail from Schyler Smith, Field Manager for BPV in Washington-Idaho-Montana, to Kim Romney, Subject redacted, relaying that a redacted doctor had placed a Meridian in the past year and discovered at retrieval that an arm fractured, which imaging confirmed had occurred within 1 week of placement, and was now wondering if he should try to remove the filter or leave it in. Van Vleet forwarded to Treratola in a high importance e-mail on 8/7, requesting that he contact the doctor on Bard's behalf.
1927			Romney, 01/18/2017, Exhibit 2062 - 12/17/2014 E-mail from Schyler Smith, Field Manager for BPV in Washington-Idaho-Montana, to Kim Romney Re. "Filter Questions", relaying that a redacted physician had another Meridian fracture and now wanted to do a data review. Asked Romney the national percentage of filters that are actually retrieved, the success rate of those attempted retrievals, and the SIR reported fracture rates on filters and the rate for Meridian.
1928			Romney, 01/18/2017, Exhibit 2063 - 9/8/2015 E-mail from Kim Romney and Nathan Comerferd to Laura Feinberg, no subject, attaching a Bard filter timeline of launch and discontinuation dates for all Bard filters up to the Denali filter launch in May 2013. "The Denali filter was redesigned from the ground up", as they "improved our technology". She listed the highlights of the Denali Trial, the "longest and largest IDE filter study available".

1931			Romney, 01/18/2017, Exhibit 2066 - 2/23/2016 High Importance E-mail from Sinead Prendergast to Sarah Cooper and Patrick Ferris Re. "FW: Denali filters", relaying that Belfast City Hospital was made aware of fracture incidents with the Denali and was surprised that Bard had not informed them of this; they now wished to do an audit of their patients who have Denali filters to assess the risks of those filters still indwelling. On 4/15/2016, Kim Romney requested that a call be set up to further discuss with Mike Randall, Director of R&D Filters.
1932			Romney, 01/18/2017, Exhibit 2067 - 8/23-9/10/2012 E-mail exchange between Dr. Frank Lynch and Mike Randall about Lynch writing a piece for Endovascular Today, which he ultimately declined on 8/27 due to his divorce. Bard wanted 2-3 of Dr. Lynch's longest implanted filter cases, which could be printed "almost like a paid advertisement section". Dr. Lynch then agreed to pursue a paper on the Meridian with his fellows to be published in a peer review journal following the SIR reporting guidelines. - On 8/23/2012, Dr. Lynch relayed that his facility had implanted 157 devices and 30 had been removed, 5 immediately because of implantation problems; their only Meridian fracture to date was placed in the SVC and removed after 44 days. His longest implant was 317 days and he had

			had to resort to "extra techniques" to remove a few. - On 9/10, Lynch reported that he had another Meridian fracture last week.
1933			Romney, 01/18/2017, Exhibit 2069 - 9/20/2012 E-mail from Kim Romney to TPE-Vascular Sales Re. "Introducing Filter Facts", introducing weekly facts and trivia every Tuesday morning "to help you conquer IVC filters" and "keep winning business". This first fact: SIR guidelines definition of perforation.
1934			Romney, 01/18/2017, Exhibit 2070 - 2/5/2013 E-mail from Kim Romney to TPE-BPV Sales Re. "Filter Facts 02.05.13", with a trivia question about the four keys to a successful Meridian filter deployment (1. Know delivery system, 2. Position filter for optimal placement, 3. Pin and pull deployment action, and 4. Deploy in one smooth, continuous motion). Chad Schlee then requested any documents showing the "acceptable" levels for filter complication rates and Romney forwarded the most recent SIR guidelines on 2/6.

1935			Romney, 01/18/2017, Exhibit 2071 - 8/19/2014 E-mail from Bryan Freud to Rick Guest Re. "The Tulip would not have done this", sharing that Huntsville Hospital, which had been a go-to Gunther Tulip facility, finally agreed to evaluate Denali and today deployed 3 Denali filters, which centered great, and the doctor said "I am sold, the Tulip would not have done this". Romney responded to Freud on 8/21 that she was in Singapore supporting the Denali launch and "promised a physician...Denali won't tilt, even in the most challenging anatomy"
1936			Romney, 01/18/2017, Exhibit 2072 - 8/17-8/18/2015 E-mail exchanges Re. "Upcoming JVIR Article". Mike Seelig, Field Manager at BPV, inquired about the filter type at issue in the JVIR September 2015 article by Hannawa et al. entitled "Percutaneous Extraction of an Embolized Intracardiac IVCF Struts Using Fused Intracardiac Ultrasound and Electroanatomic Mapping". They "don't want another Kuo". Rick Settlege determined that it included G2, Recovery, and Eclipse, but no Denali.
1937			Romney, 01/18/2017, Exhibit 2073 - 5/24/2012 E-mail from Stephanie Sands to Many Re. "SSM Filter Training", requesting 3 most common filter objections, with Rick Guest's reply that he was hearing that: Recovery had a 40% fracture rate ("now tying in Meridian with Recovery AGAIN"), while G2 and Eclipse had a 20% fracture rate; Meridian was "the same pig with lipstick", with no human studies; multiple lawsuits...

2003			Stavropoulos Deposition, 04/13/2011 - Exhibit 8 - Binkert, et al. November 2009 article entitled "Technical Success and Safety of Retrieval of the G2 Filter in a Prospective, Multicenter Study", detailing a study of 100 patients with temporary indication for caval interruption between December 2005 and July 2006. Caudal migration was an unexpected phenomenon. Retrieval was attempted in 61 patients, 95% of which were successfully retrieved after a mean dwell time of 140 days; in all failed attempts, the filter tip was against the caval wall, with no difference in dwell times between successful and unsuccessful retrievals. Caudal migrations occurred in 12% of cases (10/85); fracture in 1.2% (1/85); tilt of more than 15 degrees in 18% (15/85); leg penetration in 26% (16/61); and recurrent PE in 2%.
2004			Stavropoulos Deposition, 04/13/2011 - Exhibit 9 - Zhu et al. 2011 article entitled "Retrievability and Device-Related Complications of the G2 Filter: A Retrospective Study of 139 Filter Retrievals", detailing a study of all G2 filter retrievals (139 patients total) at a single institution from 2005 to 2009. Conclusion: The majority of G2 filters can be removed without difficulty; the most common factor affecting retrieval was severe tilting, but the indwelling time had no impact on retrieval.
